

## DRAFT

<u>Potential Components</u>	<u>South Delta Alternatives</u>		
	2- Barrier Alternative	Dredging Alternative	Central Delta Intake Proposal
Head of Old River barrier	X	X	X
Agricultural barriers	X		? <sup>1</sup>
Expanded CCFB Intake	X	X	X
Channel Dredging/Diversion Relocation <sup>2</sup>	X	X	X
Extensive South Delta Dredging		X	
Multiple Screened Intakes			X <sup>3</sup>
In-Delta Storage <sup>4</sup>	X	X	X
Connection between In-Delta Storage and CCFB			X
On - Island distribution system			X

- 1) Temporary barriers necessary until SDWA distribution system is complete and long-term barriers may be needed to address other issues such as water quality and recreation so long as SWP/CVP exports remain in the south Delta.
- 2) Extent of dredging varies for each alternative. (Most extensive is in Dredging Alternative)
- 3) Two approximately 4,000 cfs intakes implemented in increments of about 1,000 cfs units.  
(One at Bacon Island and one at McDonald Island)
- 4) In-Delta storage is future option for Preferred Program Alternative
